ABOUT US

FRP Manhole Covers (Fiberglass Reinforced Plastic) are a type of composite manhole cover that is made of polyesters and fiber glass. This light weight manhole cover is exceptional when it comes to durability, strength, and corrosion resistance. You must ditch the traditional manhole covers.

We are exporters of high quality FRP Manhole Covers. We always source goods from the leading manufactures that follow in-house quality control process of inspection and certification. While procuring goods from the manufacturers, we ensure that the manufactured products are produced and maintained to a high standard. Quality Control (QC) involves testing units to determine if they are within the specifications for the final product.

FRP manhole covers are designed to withstand the test of time. Their lightweight nature allows for easier installation in busy traffic areas, reducing disruption during maintenance. Despite their lightness, FRP covers are robust enough to handle the heavy loads associated with vehicular traffic, ensuring the safety and reliability of the roadways.

FRP MANHOLE COVERS

Size	Pieces	DMC (Machine Mould)	Weight Per Piece (kg)	Master Box
10x10	1	Available	2.1	10 Pcs.
